Buffalo, NY, USA

EXPERIENCE

UBLends

- Developed an online marketplace for University at Buffalo.
- In a team of four, I was responsible for front-end design and development utilizing **ReactJS, HTML and CSS**.

Cypher: Password Manager

- Led the design and development of a password manager web application built using **HTML, CSS, JS, PHP and MySQL** alongside three other team members.
- Handled design, complete frontend development and a few backend features.

Digital Currency Street Journal

- Developed a cryptocurrency and blockchain journal to monitor real-time trends and updates.
- Created a simple yet effective User Interface using various tools including **HTML, CSS, JavaScript** and **Wix**.

Frontline.AI

- **Won 1st Place in University at Buffalo's yearly Hackathon (2021) out of hundreds of teams.**
- Constructed, with a team of three, a mask vending machine for people entering the grocery stores without wearing masks during the Covid-19 pandemic.
- **Technologies Used:** **OpenCV** to process real-time video feed to detect masks on faces.
MIT App Inventor to develop an application to notify grocery store owners.
Arduino for fabricating a face mask vending machine.

Teaching Assistant - University at Buffalo, Buffalo, NY

Jan 2022 - Present

- Teaching Assistant for Prof. Kenneth Regan's **Data Structures and Algorithms** Course.
- Responsibilities include grading assignments alongside conducting recitations and office hours to help students.
- Encouraged student independence and academic achievement by exploring new concepts and activities.
- Provided tutorial support to students both one-on-one and in group sessions.

Teaching Assistant / Tutor - De Anza College

January 2018 - June 2019

- Tutor for CS and STEM courses.
- Teaching Assistant for English Writing 1A under Prof. Alex Giardino
